How do I download asset classes?

Quicken automatically downloads asset classes for all your securities, even mutual funds. The procedure below will let you override the automatic download and assignment of asset classes for your securities.

1. Click the **Investing** tab.
2. Click the **Tools** button, and choose **Security List**.
3. Click the name of the security that you want to change.
4. Click **Edit Security Details**.
5. In the **Edit Security Details** dialog, change the asset class information, as necessary.
