

# How do I resolve data missing from Investing tab snapshots?

For any snapshot that contains asterisks:

1. At the bottom of the snapshot, click the **Show Me** link.  
Quicken displays the **Resolve Placeholder Entries** window. This window lists any securities included in the snapshot for which cost basis information is incomplete.
2. At the far right of the row on which the security is listed, click **Enter**.
3. In the **Enter Missing Transactions** dialog, follow the on-screen instructions to [resolve the placeholder entry](#) for the selected security.
4. Repeat steps 2 and 3 for additional securities listed in the **Resolve Placeholder Entries** window.
